**Striving for  
excellence  
Alex Davidovskiy  
receives the  
Founders' Award**

Alex Davidovskiy received the Founders' Award for Innovation and Entrepreneurship at the AES Kick Off Event in January in Cancun. The Founders' Award represents one of AES's highest honors and recognizes truly outstanding contributions made by AES people.

With the Risk Assessment tool, which helps people predict, identify, prioritize maintenance to lower the risk of and mitigate failures, Alex Davidovskiy delivered last year an effective tool for the North America region. He also took the initiative to share it with other AES people around the world at 14 plants in 8 countries. Using his expertise and plant knowledge, he helped others prevent equipment failures and implement corrective measures.

Alex went above and beyond what is expected to make a difference and drive results for AES while at the same time, serving as a role model in terms of living our values.
